

***UNITED STATES – LAWS, REGULATIONS AND METHODOLOGY  
FOR CALCULATING DUMPING MARGINS (“ZEROING”)***

**WT/DS294**

**Questions from the United States to the European Communities**

**March 18, 2005**

We note that the affidavit attached to the third party submission of Japan as Exhibit JPN-2, and which the EC has incorporated as either Exhibit EC-43 or EC-44, states that what it calls the “standard computer program” has been revised multiple times throughout the period from when the AD Manual was completed until the date that the EC requested this panel. Would the EC please clarify the exact measure it is challenging? If the measure is an entire program, would the EC please specify which program and the precise version/edition of that program it is challenging? If the EC, alternatively or additionally, is challenging a particular line, sub-routine, or section of programming, would the EC please specify which line, sub-routine or section of programming it is challenging?
