#### Kyrgyzstan and the U.S. Generalized System of Preferences (GSP) Program How to Use GSP Duty-Free Benefits to Increase Kyrgyzstan's Exports March 2008

#### What is GSP?

The U.S. GSP program provides significant opportunities for Kyrgyzstan to increase its exports to the United States. GSP provides duty-free treatment for about 3,400 types of exports from Kyrgyzstan and 130 other developing countries. The purpose of the GSP program is to give these exports a competitive edge in the U.S. market. U.S. companies and customers are especially interested in buying goods through the GSP program because the exports are not charged tariffs, upon entering the United States, which can range from two percent to seventeen percent of the items' cost. U.S. imports under GSP from all beneficiary countries totaled \$32.6 billion in 2006 and \$30.8 billion in 2007.

Many items are eligible for GSP duty-free treatment. These include most manufactured goods; inputs used in manufacturing; jewelry; many types of carpets; agricultural and fishery products; and many types of chemicals, marble, and minerals. Not eligible for GSP duty-free treatment are certain textiles and apparel; watches; some footwear, handbags, and other leather items; luggage; most cloths and sheets for kitchen and bedroom use; and work gloves. The chart below shows the percentage of product types entering the United States under the GSP program in 2006.

# A list of U.S. imports from Kyrgyzstan under GSP in 2006 and 2007, as well as those U.S. imports that were eligible for GSP duty-free treatment but were not claimed as such by U.S. importers is shown in Attachment Two.

In summary, U.S. importers of Kyrgyz exports do not claim GSP duty-free import for almost all GSPeligible items from Kyrgyzstan. This results in Kyrgyz exports to the United States less competitive in the U.S. market:

	2006	2007_
Total of all GSP-eligible products imported into United States (2006 and 2007)	\$998,717	\$361,747
Total of all GSP-eligible products claimed under GSP when imported into U.S.	\$19,072	\$27,951
Percentage of all GSP-eligible products claimed under GSP	1.91%	7.73%

2000

~~~~

The last percentages mean that in 2006, only 1.91 percent of all GSP-eligible items were claimed under GSP by US importers. That improved very slightly in 2007 to 7.73%. The average of all GSP beneficiaries is about 88% of all eligible items being claimed. Unfortunately, Kyrgyz exporters are not taking advantage of the GSP program, which is an excellent opportunity to get their goods into the U.S. market duty-free and to enhance their goods' competitiveness. Because it is very difficult to communicate this to all U.S. importers, the best approach is to work with the Kyrgyz government, business associations, and with individual Kyrgyz producers, manufacturers, and other exporters. It is very important AND SAVES MONEY that they tell their U.S. importers should claim the eligible imports under GSP on the Customs Summary Entry Form (form 7501 – Attachment One).

#### How does a U.S. import from Kyrgyzstan receive GSP duty-free treatment?

A GSP-eligible import must meet the following requirements:

- be included on the list of GSP-eligible articles;
- be imported into the United States directly from Kyrgyzstan or pass through another country under a bill of lading
- be the growth, product, or manufacture of Kyrgyzstan;
- if some materials used to make the product are imported into Kyrgyzstan, the cost of the Kyrgyzstani materials plus the cost of processing must equal at least 35 percent of the product's sales price;
  - imported materials can count toward that 35 percent only if the imported materials are "substantially transformed" and then used to produce or manufacture the export
  - "substantially transformed" means that the imported items go through at least two types of changes in form from when they were first imported
  - <u>MOST IMPORTANTLY</u>: The importer must request duty-free treatment under GSP by placing an "A," in front of the Harmonized Tariff Schedule of the United States number that identifies the imported article on U.S. Customs Entry Form 7501 (see Attachment One).

#### What documents are needed to ensure GSP duty-free treatment?

- For agricultural exports:
  - 1. Producer's statement verifying which town and farm the product is grown on;
  - 2. Description of product and quantity;
  - 3. Dated invoices for costs incurred.
- To verify the 35 percent rule-of-origin requirement:
  - 1. Dated invoices for materials used to produce the good, showing from where the materials came;
  - 2. Description of product and quantity.
- If processing operations are involved:
  - 1. Description of processing and location;
  - 2. Documentation of the direct costs of processing operations.

NOTE: The importer must keep all documents for at least five years.
